EXPERIENCE

Aggarwal Vikram and Associates

May. 2026 – Present

Data Analyst & AI Automation Engineer

Delhi, India

- Built an **Attendance Management System** with live photo capture via **Google Apps Script & JavaScript**, enabling real-time tracking and eliminating manual errors
- Automated end-to-end **Sales Process Workflow** using **Google Workspace & Apps Script**, improving productivity, sales performance, and customer engagement
- Developed **FMS & PMS** with auto task assignment, real-time updates, and trigger-based flows to streamline operations and team coordination
- Integrated **AI-assisted automation** across sales, attendance, and project modules to enable data-driven decision-making and reduce manual overhead

Reliable Allied Services (Operating under Diamond Ore Consulting Pvt. Ltd.)

Jul. 2024 – April. 2026

Data Analyst

Noida, India

- Developed and maintained MIS reports and interactive dashboards using **Power BI, Excel, and Google Sheets**, improving performance tracking and reporting efficiency
- Performed data extraction, cleaning, and analysis using **MySQL and Python (Pandas, NumPy)**, helping identify trends and reduce data inconsistencies
- Automated reporting workflows using **Python and Excel VBA**, reducing manual effort and improving reporting speed
- Designed dashboards and visualizations using **Power BI, Matplotlib, and Seaborn** to support data-driven decision-making
- Conducted exploratory data analysis and implemented basic machine learning models using **Scikit-learn** for predictive insights
- Built and automated Google Sheets solutions using **JavaScript** for candidate tracking and reporting, improving data accuracy and reducing manual work
- Implemented data validation processes and structured data storage, minimizing errors and improving data reliability
- Developed real-time dashboards for recruiter and sales performance monitoring, enhancing team visibility and productivity

Reliable Allied Services (Operating under Diamond Ore Consulting Pvt. Ltd.)

Apr. 2024 – Jul. 2024

Data Analyst Intern

Noida, India

- * Maintained and organized **Master DSR datasets and CV shared reports** categorized by recruiters and Key Account Managers to track recruitment activities
- * Prepared and analyzed performance data for the **weekly RR (Rewards & Recognition) program** to support internal performance evaluation
- * Managed and updated **consolidated call records and open position tracking reports** to monitor recruitment pipeline status
- * Assisted in data cleaning, validation, and reporting using **Excel, Google Sheets, and MySQL** to support operational reporting
- * Successfully completed the internship with **performance exceeding expectations over 90 working days**

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (BBDIT College)

2025 - 2027

Bachelor of Computer Applications (BCA)

Ghaziabad, UP

- **Coursework:** Data Analysis, Algorithms, Database Management Systems, Computer Systems, Machine Learning, C++, Object-Oriented Programming (OOP)

PROJECTS

Loan Analytics ETL & BI Platform | *Python, Pandas, SQL, DuckDB, PostgreSQL, dbt, Apache Superset*

 github.com/im-adilkhan/LendingClub-Data-Pipeline*Analysis*

- * Designed and developed an end-to-end **ETL/ELT pipeline** to process and transform over **2.2 million loan records** from the Lending Club dataset.
- * Built modular ETL workflows for **data extraction, validation, transformation, feature engineering, and warehouse loading** using Python (Pandas, NumPy).
- * Performed data cleaning, missing value imputation, duplicate removal, datatype conversion, and schema validation to improve data quality and consistency.
- * Implemented business-rule validation including loan amount, interest rate, and loan status checks before loading data into the warehouse.
- * Loaded processed datasets into **DuckDB** and **PostgreSQL**, creating an analytics-ready data warehouse for reporting and SQL analysis.
- * Developed **dbt staging and mart models** with reusable SQL transformations and data quality tests.
- * Created SQL **views** and **indexes** to optimize analytical queries and improve reporting performance.
- * Engineered business features such as loan-to-income ratio, borrower segmentation, loan age, and risk categories for credit-risk analysis.
- * Generated business KPIs including **Default Rate, Portfolio at Risk (PAR), Loan Approval Rate, Average Loan Amount, ROI by Loan Grade, and Interest Rate Distribution**.
- * Built interactive BI dashboards using **Apache Superset** to visualize portfolio performance, loan trends, and credit-risk metrics.
- * Automated the complete ETL workflow using a reusable Python pipeline with a modular and production-style project architecture.

SKILLS

Programming Languages: Python, C++, SQL (PostgreSQL, MySQL), HTML/CSS

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn

Data Analysis & Machine Learning: Scikit-learn (intermediate)

Data Visualization & BI Tools: Power BI, Excel (VBA), Google Sheets (JavaScript Automation)

Database Management: MySQL, PostgreSQL

Productivity Tools: MS Office Tools
